

## WB R-TPS 8400 SERIES 300 PSF Aluminum Recessed Floor Hatch

### STORAGE, HANDLING, INSTALLATION & MAINTENANCE INSTRUCTIONS

#### STORAGE

Before installation, store floor access doors in a clean, dry environment that is free from dirt and debris. Keep the doors on their original shipping pallets for stability and protection.

#### HANDLING

Exercise standard safety practices when handling or moving palletized floor access doors. Use forklifts or appropriate equipment to prevent damage.

#### INSTALLATION

1. Ensure formwork is level and flush with the inside of the frame.
2. Secure the unit to the formwork using standard construction techniques.
3. Keep the cover in the closed position when pouring concrete.
4. Finish concrete flush with the top surface of the access frame.
5. Allow concrete to set with the unit in place for a minimum of 24 hours.
6. Clean all residual concrete from the cover seat, frame, and drainage coupling (if applicable).

#### MAINTENANCE

1. Lubricate all locking mechanisms annually with graphite.
2. Apply light machine oil to all hinges and hardware components.
3. Remove any dirt or debris buildup around hinges and the cover seat.
4. Inspect and tighten all hardware to ensure secure operation.
