

BABA Compliance Statement

Williams Brothers Corporation of America is proud to confirm that our EXT 1350 Ultra Series Insulated Exterior Access Door with Locking Paddle Latch is Build America, Buy America Act (BABA) compliant.

Manufactured with domestic galvanized steel and assembled in our Virginia facility, the EXT 1350 Ultra Series fully meets BABA requirements by supporting U.S. manufacturing, job creation, and infrastructure investment. Architects, contractors, and builders who specify the EXT 1350 can do so with complete confidence — knowing they are selecting a product built to perform in the harshest exterior environments while directly supporting American workers and communities.

Why Specifiers Choose the EXT 1350:

- **Made in the USA — Proudly Fabricated in Virginia.** Every EXT 1350 is built domestically, ensuring full BABA traceability and eligibility for federally funded projects.
- **Premium Construction. Proven Performance.** 16-gauge galvanized steel, a continuous piano hinge, paddle latch lock with interior release, 2" Kingspan GreenGuard XPS insulation (R-5.0/inch), and double seal gasketing combine to deliver an exterior access door unlike any other — Wind Rated DP-52 (Category 4 Hurricane, 144 MPH) and Sound Rated STC-62.
- **Independently Tested. Decades Proven.** Taber Abrasion tested (4,550 cycles, ASTM D4060), Salt Spray tested (48 hrs, ASTM B117), and UV tested (ASTM G155 & G154) — backed by over 30 years of American manufacturing excellence.

The EXT 1350 Ultra Series is more than a weather-resistant access solution. It is a product designed to exceed today's requirements for performance, compliance, and American craftsmanship — the clear choice for projects that demand the very best.
